

# Get more from what you have.

## Invest smarter in what's next.

ProCern®
TECHNOLOGY SOLUTIONS

**Technology budgets are under pressure. But reducing costs shouldn't mean sacrificing security, performance or progress.**

ProCern takes a Net Positive approach to IT, evaluating your technology environment to uncover inefficiencies, identify gaps and overlaps, consolidate where it makes sense and get greater value from investments you've already made.

## Finding value before adding cost.

**Before recommending another product, platform or project, we look at the complete picture.**

### Discover

We start with your business priorities, technology environment, challenges and limitations to understand where you are today and uncover opportunities that may otherwise be missed.

### Assess

We identify gaps, overlaps, unnecessary complexity and areas where spending may not be delivering enough value.

### Optimize

Where it makes sense, we help consolidate vendors, eliminate redundant tools and licensing, improve utilization and get more from technology you already own.

### Align

Then we build a practical roadmap around your operational priorities, financial goals and what will deliver the greatest value to your business.

**Get a clearer picture of where your IT dollars are going, where savings can be found and where future investments can make the greatest impact.**

PROCERN.COM

## More value. Less waste.

### Lower unnecessary spend

Identify redundant tools, licensing, infrastructure and services.

### Fewer vendors. Less complexity.

Consolidate where it improves both economics and accountability.

### More value from existing investments

Optimize what works before replacing what doesn't.

### More capacity for your team

Shift routine operational demands to ProCern so your team can focus on higher-value priorities.

### A clearer IT roadmap

Prioritize investments based on business value, risk and actual need.

## Technology that earns its place in the budget.

# Whatever your technology demands, **we're ready to meet it.**

## Core IT Solutions

### 24/7 MSP
- Full IT Stack, monitoring & management
- On-prem, Cloud, & Hybrid Environments
- Managed Network-as-a-Service

### Healthcare
- Senior Living and Long-Term Care Specialty
- U.S.-based managed Device-as-a-Service
- Reduce costs while improving service to patients

### Artificial Intelligence
- Complimentary readiness & immersion workshops
- ProCern's approach to responsible AI
- Realized value with proven use cases

### Cloud Management
- Public Cloud Managed Service Provider
- AWS, Azure, Google
- Cost Analysis, Migration, Security

### Data
- SIEM & TDIR Data Pipeline Optimization
- Enterprise AI Readiness & Governance: Structured data processing, classification, securing.
- Hybrid IoT & Edge Cost Efficiency

### Disaster Recovery
- Near Real-Time Replication
- Backup Planning and Management
- Disaster Recovery-as-a-Service (DRaaS)

## Cybersecurity

### Full-Stack MDR
- Agentic AI-Augmented MDR: 24/7 U.S.-based SOC with HITL, cross-stack correlation and continuous threat hunts
- Data Pipeline Optimization: Zero gaps and ingestion cost savings
- Keep/replace your tool stack with flexible, predictable pricing

### Cyber Health Plan
- Predictable Protection: Customizable security solutions at a fixed monthly investment
- Penetration Testing, Table-tops, Vulnerability Scans, vCISO, Compliance Readiness Assessments, BCP/DR
- CMMC Registered Practitioners (RPO)

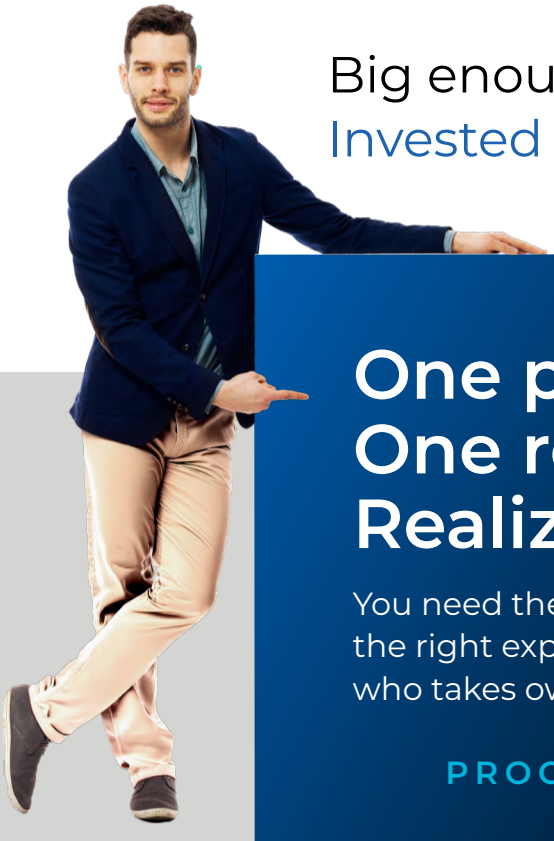
### Security Operations
- SecOps: Consume only what you need
- Cyber Engineering Services On-Demand – U.S.-based
- Specialized Cyber Services to configure and operate your toolsets

### Application Security
- On-Premise and/or SaaS based toolsets
- Integrated security into your software development lifecycle (SDLC)
- Staff Augmentation for Vulnerability Repair

## Legacy Systems

### ERP Support
- E2E Support for Ongoing Operation of Legacy ERP
- ERP Apps Supported: JDE World, PRISM, AVANTIS, KBM, ISD, PRMS, and More!
- ERP System Admin, Hosting, VPC, & Security

### IBM i (AS/400), AIX, & Linux
- i Cloud / Full Ecosystem
- API Secure, Private Cloud
- E2E Support, Modernization, & Ongoing



## Big enough to deliver.
## Invested enough to care.

- Serving clients since 1994
- 300+ employees
- 97% annual client retention
- 24x7 managed NOC
- U.S.-based 24x7 SOC
- Onsite technicians available across 150 countries

# One partner. One roadmap. Realized value.

You need the right technology, the right expertise and a partner who takes ownership.
