³ Cybersecurity Insiders 2024 Security Services Edge (SSE) Adoption Report

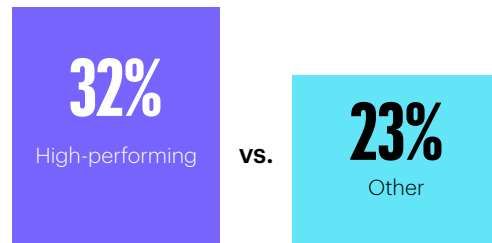

What the experts have to say

High-performing organizations are more likely to deploy zero trust and SASE architectures.⁴

Deployed zero trust

Deployed SASE

Gartner®

“Security and risk management leaders must converge networking and security into one or two explicitly partnered SASE vendor offerings and retire legacy perimeter systems.”

Download the complimentary Gartner® report to explore the future state, the current state, gaps, and migration plans for SASE convergence so you can stay ahead.

SASE journeys from around the world

Hear why other organizations choose unified SASE

BETHESDA

“HPE Aruba Networking SSE provides us with the cybersecurity protections for creating a powerful unified SASE platform that helps advance our cloud-first goals.”

Michael Keller, Director of Information Technology, Bethesda Health Group

“HPE Aruba Networking EdgeConnect not only finds the best available path to keep us operating, but we also have the leverage to hold carriers accountable for their service levels. It’s been outstanding.”

Mark Taylor, Network Manager, USANA Health Sciences

“What we learned in the last few years is that we can never trust the person at the keyboard. So a zero trust policy has really enabled us to question every step of the way.”

Khaled Tawfik, CIO, City of San Jose

REPUBLIC BANK

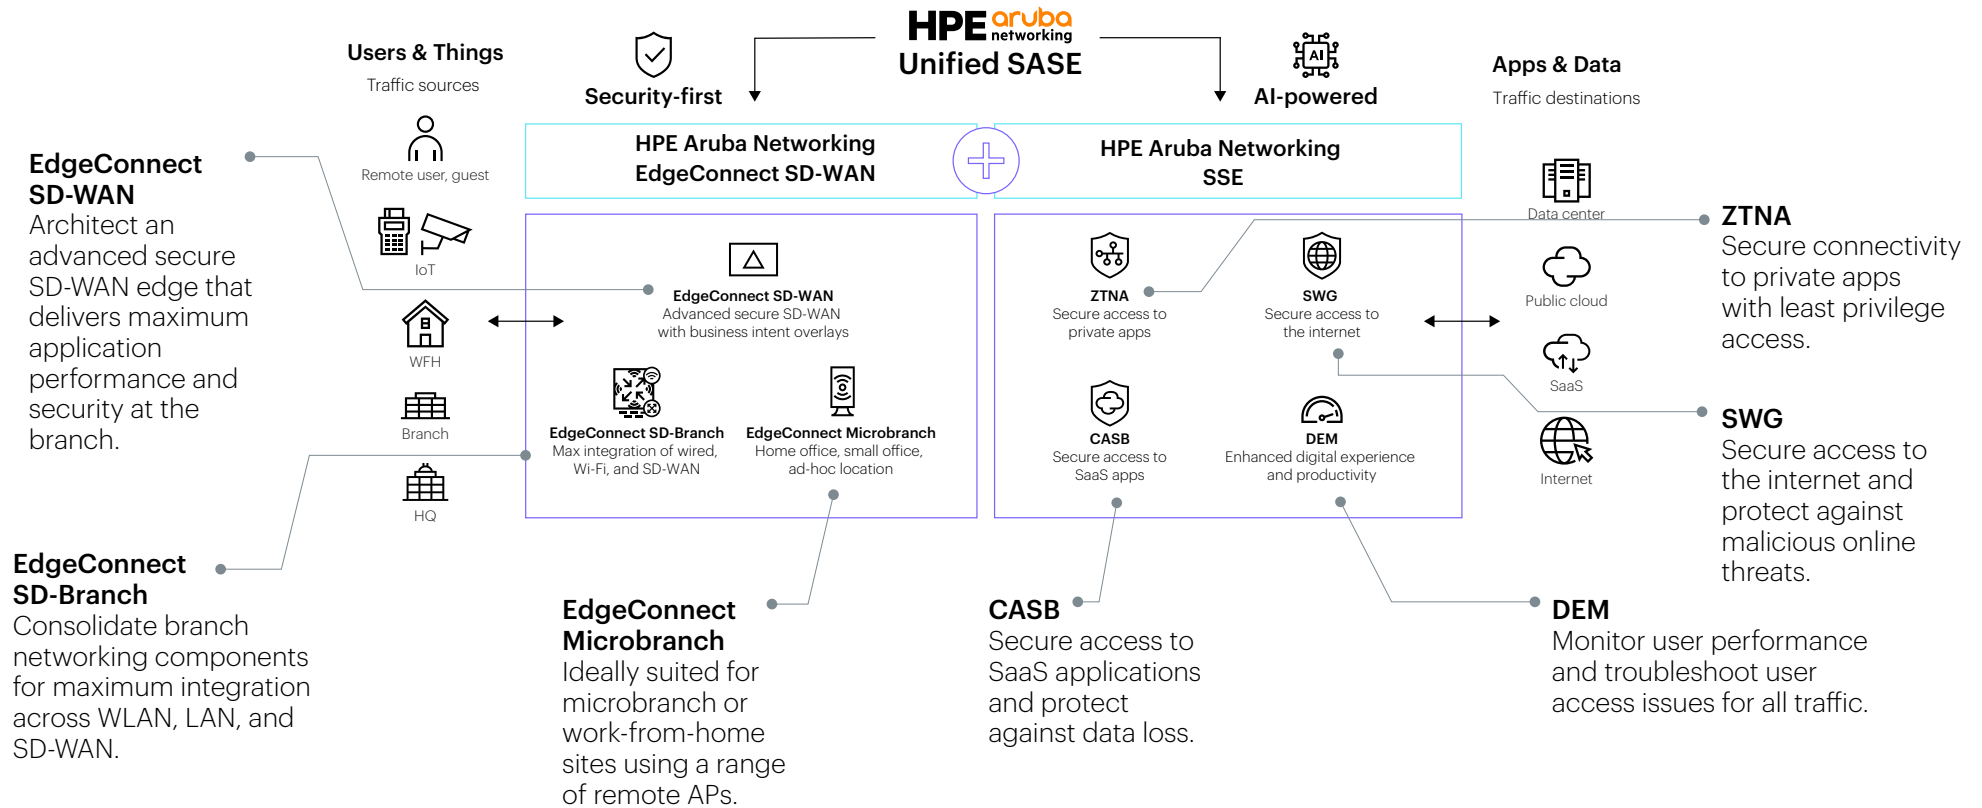

“If we had to put firewalls in every location, that would mean manual deployments and a lot more devices to configure. Instead, we can create a firewall template and deploy it in a few clicks.”

Eric Hubbard, Infrastructure Technology Manager, Republic Bank

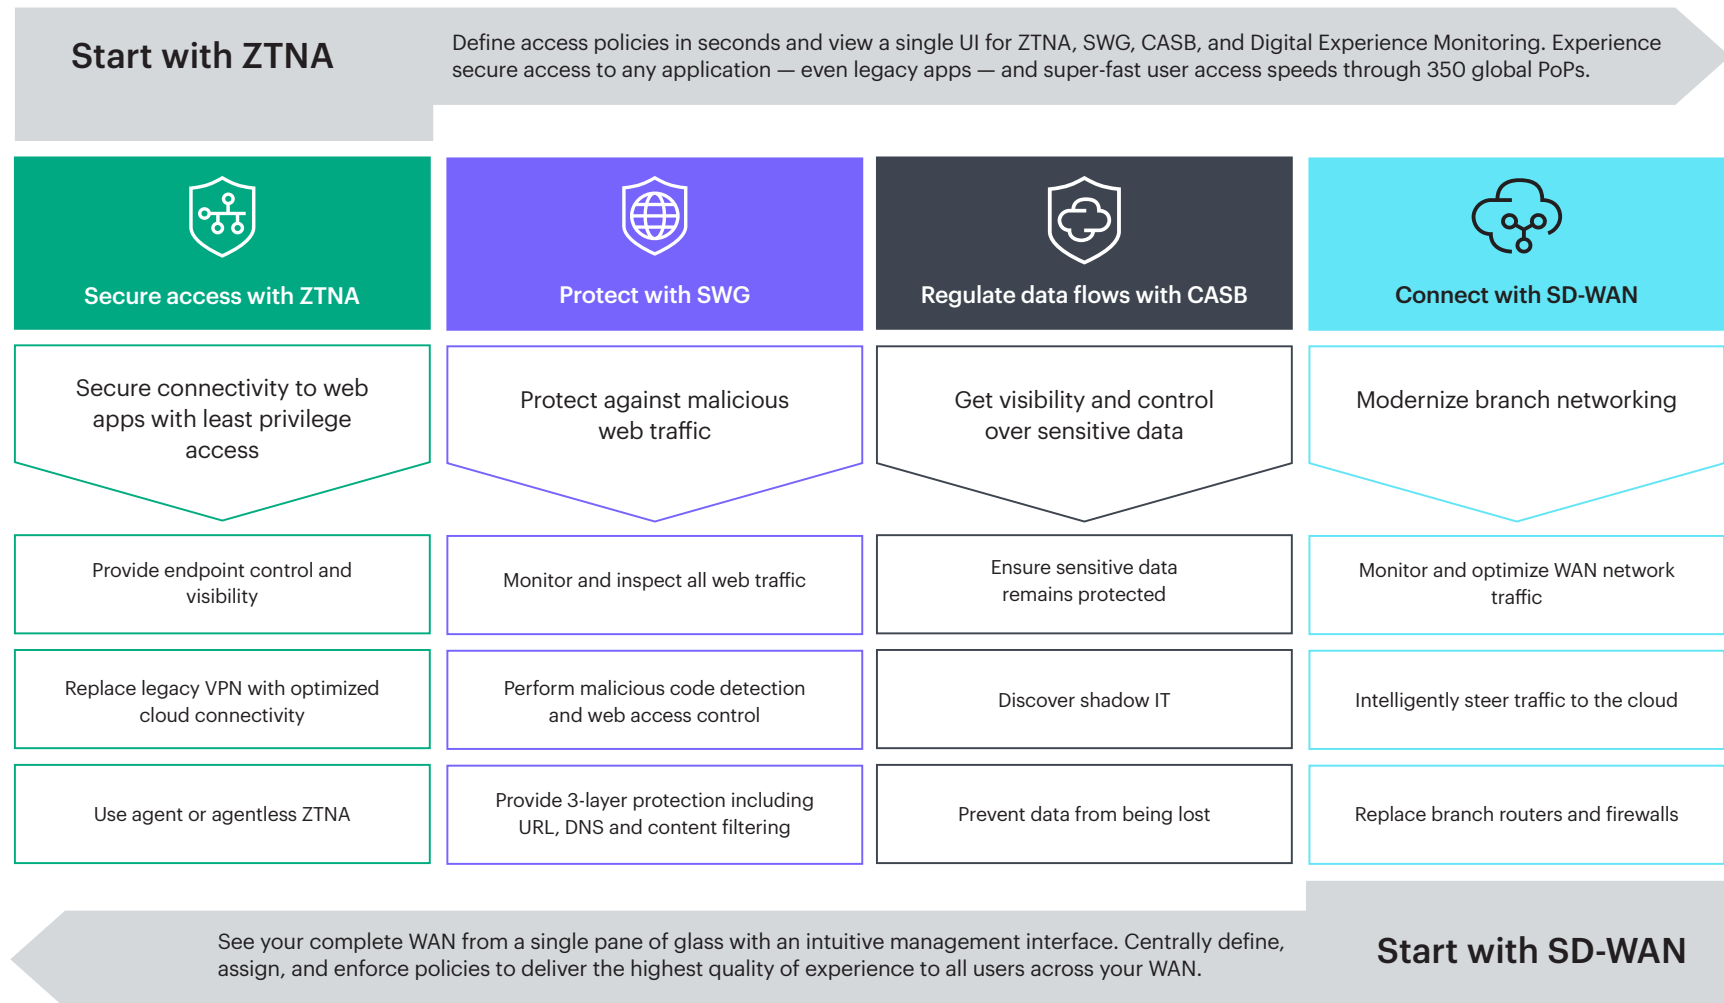

Accelerate your journey to SASE with a unified platform

No-compromise networking and security at the edge

Networking teams win with HPE Aruba Networking Unified SASE

The benefits of unified SASE extend to those responsible for the integrity and performance of the IT infrastructure — its design, implementation, integration, and technical governance.

The journey to unified SASE starts with industry-leading SD-WAN

Deliver the highest levels of optimization, orchestration, application performance, and availability with a unified solution.

Shift to a business-first network

Move to a modern networking and security solution — one that will satisfy the needs of financial controllers, CISOs, operations managers, innovators, legal and ESG directors, and your workers.

Deliver maximum value from cloud

Extend the benefits of SD-WAN to simplify and automate multi-cloud connectivity to leading cloud and SaaS providers with a unified single-vendor SASE solution.

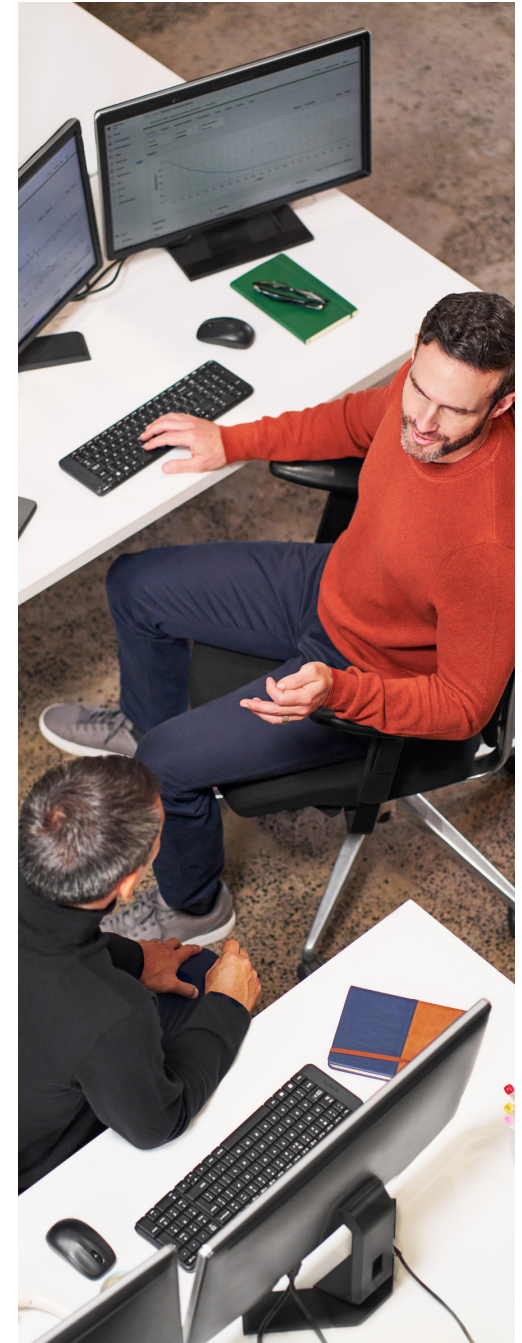

Connect and protect to contain costs

Consolidate operations, remove roadblocks between network and security teams, and reduce costs by unifying two technologies into one platform, one contract, and one UI.

Navigating single-vendor SASE: Charting the course for next-gen enterprise networking

Trusted industry analyst Dell'Oro comes together with HPE Aruba Networking to discuss the top considerations and benefits of a single-vendor approach to a SASE architecture.
