

AI Immersion | Workshop

Accelerate Your AI Journey

The **ProCern AI Immersion Workshop** is a structured, intensive two-day engagement designed to help your organization move from AI exploration to execution. By leveraging human-centered design thinking, we guide your leadership through aligning AI opportunities with strategic goals and technological readiness. The result is a clear, executable 6-to-12-month roadmap that identifies high-impact use cases and ensures tangible business value.

1. Executable AI Roadmap

We deliver a prioritized 6-to-12-month actionable plan that identifies "quick wins" and strategic initiatives with defined success metrics.

2. Data Lake & Infrastructure Review

We conduct a high-level audit of your current data pipelines and analytics platforms to ensure your AI goals are grounded in operational reality.

3. Governance & Risk Mitigation

Our sessions explicitly address data accessibility, regulatory compliance, and ethical AI frameworks to ensure your strategy is both innovative and secure.

4. Business Value Alignment

We provide a transparent linkage between prioritized use cases and their direct impact on operational efficiency, customer satisfaction, or revenue growth.

5. Maturity & Readiness Insights

You will receive a detailed evaluation of your organization's current AI capabilities across data, tools, skills, and culture.

6. Leadership Consensus

Through in-depth C-suite interviews, we gauge change management readiness and ensure long-term executive support for AI-driven transformation.

7. Human-Centric Approach

Use a user-focused methodology to ensure solutions enhance workflows, solve real problems, and strengthen your internal team's AI understanding and best practices.

Focused Strategy & High-Impact Deliverables

Our engagement condenses complex technical discovery into actionable business intelligence, focusing on the following core outcomes:

INVESTMENT:

\$9,500 (One-time flat fee)

TIMELINE:

2-Day Workshop with pre-engagement discovery

CLIENT COMMITMENT:

Designates a Single Point of Contact (SPOC) and ensures participation from key stakeholders (IT, business leadership, and data teams).
