

AI Solutions

Practical, Scalable, Real-World AI. Built for Your Business.

Transforming Real-World Workflows with AI

At ProCern, we design and deliver AI-powered solutions that solve real problems—fast. From legal and healthcare to cybersecurity and compliance, we partner with organizations to unlock the full potential of artificial intelligence without the hype.

What We've Done with AI

Legal Data Automation

Automated time and labor data extraction across diverse systems—cutting manual effort and accelerating trial readiness.

Client: Class Action Law Firm

Challenge: Manual review of time and labor records in multiple formats

Solution: ProCern developed an AI-enhanced Optical Character Recognition (OCR) system that automates data extraction across ADP and other timekeeping systems. The solution continuously learns new formats for ongoing accuracy.

Impact:

- Reduced manual workloads
- Accelerated trial readiness
- Increased confidence in legal evidence

AI-Powered Compliance Automation

Cut compliance response times from weeks to hours—without compromising accuracy.

Challenge: Lengthy questionnaire completion for frameworks like SOC 2, PCI, ISO, NIST

Solution: ProCern's AI-Powered Compliance Automation uses NLP and AI to analyze policy documents, past responses, and assessments to auto-generate accurate answers.

Impact:

- Weeks-long tasks done in hours
- Improved accuracy and traceability
- Export-ready in Word or Excel

AI-Driven Quality Assurance

Audit calls in real time and flag issues instantly—no more manual review.

Client: Healthcare provider

Challenge: Manual call audits

Solution: ProCern built scalable AI platform to automatically audit support calls, extract key data, and score agent performance.

Impact:

- Streamlined auditing
- Real-time QA scoring
- Reduced burden on internal reviewers

Smarter Security with AI-Enhanced SOC

ProCern brings cutting-edge, self-hosted AI into our SOC, turning complex alerts into clear, actionable insights..

Challenge: Manual alert triage and slow incident response

Solution: ProCern integrated self-hosted LLMs into our SOC platform, adding no-code automation and client-specific learning models.

Impact:

- Reduced false positives
- Automated reporting
- Faster analyst response

ProCern delivers AI solutions from strategy to execution—designed to build, manage, and scale AI with confidence.

ProCern AI Solutions—Four Pillars of Value

AI Services

- Workshops
- Assessments
- Adoption frameworks to set a strong foundation

Managed AI Services

- AIOps
- Infrastructure monitoring
- Lifecycle governance
- Cloud/edge integration

AI Consulting Services

- Strategy
- Roadmap planning
- Governance
- Ethics
- Organizational readiness

AI Implementation Services

- Proof of concept
- Workflow integration
- Deployment support
- Ongoing optimization

Together, these offerings ensure your business can confidently move from AI exploration to sustainable, scalable results.

**ProCern's Proven
Path to AI Success:**

**Workshop →
Assessment →
Adoption →
Management.**
