

Don't
drown in
downtime.

Recover quickly.

The Danger of Downtime

Unplanned outages put business operations, revenue, and reputation at risk. Traditional disaster recovery for IBM i systems is often costly, complex, and difficult to maintain. Without a proven plan, organizations remain vulnerable to natural disasters, cyberattacks, and system failures.

Your Lifeline

ProCern's Disaster Recovery as a Service (DRaaS) provides a reliable, fully managed solution to protect IBM i systems. Built on **Rocket iCluster**, our service delivers continuous data replication, rapid failover, and simplified recovery management—ensuring your business stays operational, even when disruption occurs.

Built for Resilience

Real-Time Replication

Continuous mirroring of critical apps and data with proactive monitoring.

High Availability

Automated failover brings systems online within minutes.

OPEX Model

Predictable, subscription-based pricing with no big capital expense.

Fully Managed Service

Setup, monitoring, and testing handled by ProCern.

Migration Ready

Modernize outdated IBM Power Systems in our secure private cloud.

ERP Modernization (OPTIONAL)

Transform legacy ERP into modern, web & mobile-ready tools.

Business Continuity:

Keep operations running through any outage or disaster.

Near-Zero Downtime:

Automated failover ensures recovery in minutes, not days.

Minimal Data Loss:

Continuous replication keeps data current and secure.

Operational Simplicity:

Offload the complexity of disaster recovery to ProCern's experts.

Predictable Costs:

OPEX-based pricing makes budgeting straightforward.

Peace of Mind:

A tested, fully managed recovery plan reduces risk and builds confidence.

Be Ready Before Disaster Hits

Is your business prepared for the unexpected?

Schedule a consultation with ProCern to evaluate your environment and design a disaster recovery plan that keeps you protected.
