

# Hosted & Managed LogRhythm AS A SERVICE

## DID YOU KNOW?

---

LRCloud was discontinued Q1 2025. We can migrate your data, rules, and peace of mind in no time.

---

We're North American LogRhythm Partner of the Year!

---

ProCern has built in D/R in geographically separated data centers in all our offerings.

---

Using your LR7 SIEM as a MDR is an available option with ProCern.

---

## LogRhythm Security Information and Event Management (SIEM) AS-A-SERVICE

ProCern Technology Solution's hosted and fully managed LogRhythm Security Information and Event Management (SIEM) as a Service offering provides organizations with a comprehensive solution for monitoring, detecting, and responding to security threats without the need to maintain complex infrastructure or specialized in-house expertise. Our service leverages our private cloud-based infrastructure to collect and analyze security data from all your logging sources, including network devices, servers, applications, and endpoints. Managed by experienced and certified security professionals around the clock from our US-based security operations center (SOC), our service offers real-time threat intelligence, automated to semi-automated detection and response (MDR), and compliance reporting, all delivered through a scalable and cost-effective subscription model.

By opting for ProCern's hosted and fully managed LogRhythm as a Service, organizations can strengthen their security posture, streamline operations, and achieve regulatory compliance efficiently and cost-effectively. Let us take over the heavy lifting of SIEM, be an extension of your team, and allow you to realize the value of what this system can do for your environment.

## CHALLENGE

- Lack of tool-set knowledge.
- Inability to staff around the clock.
- Too much overhead to manage effectively.
- Required infrastructure maintenance.
- Public cloud offerings are too expensive.
- LR7 is discontinuing when it's finally matured!

## OBJECTIVES

- Retain LogRhythm expertise.
- 24x7x365 coverage.
- Outsource care and feeding.
- Focus on the service rather than the hosting infrastructure.
- Reduce your expenses while increasing your security posture.

## RESULT

- 100% visibility into your SIEM instance, our work, and SLAs!
- 85% Average reduction in MTTD and MTTR to threats in client environments.
- 97% Clients that realize more value from the system than before.

## BENEFITS

### Enhanced Security Posture

Continuous 24/7 monitoring ensures timely detection and mitigation of potential threats. Advanced threat detection leverages behavioral analytics to identify sophisticated threats that traditional systems might miss, along with industry best practices driven IoC identifying policies

### Operational Efficiency

The service reduces complexity by eliminating the need for managing and maintaining on-premises SIEM infrastructure. Organizations benefit from expert management, accessing a team of security professionals who handle the setup, configuration, and ongoing management of the SIEM solution.

### Cost-Effectiveness

A subscription-based model provides predictable pricing, avoiding large upfront investments in hardware and software. The service is easily scalable, allowing organizations to adjust based on their needs without incurring significant additional costs.

### Compliance and Reporting

ProCern's solution helps meet compliance requirements with built-in reporting and audit capabilities. Automated reporting generates comprehensive security reports, simplifying the audit process and demonstrating compliance to regulators.

### Rapid Incident Response

Automated workflows streamline incident response processes with customer defined playbooks, actions we can take around the clock to mitigate, and provides a collaboration platform when needed. Real-time integration with threat intelligence feeds enhances the accuracy and speed of threat detection and response.

Contact us for more details!

#### Standard Offering includes:

- Fully managed and hosted LogRhythm instance
- Tuning out the noise
- Ad-hoc investigations
- Monthly meetings and reports with your defined engineer

#### MDR offering includes:

- Everything from Standard and then some.
- Predefined steps ProCern can take on your behalf 24x7.
- Advanced Integrations and playbook creation, utilizing your security tools in place today.
