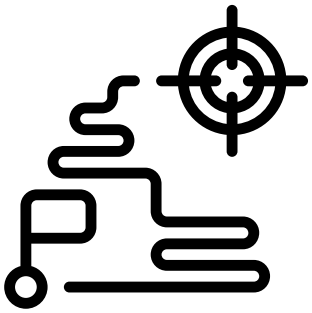
ProCern®
TECHNOLOGY SOLUTIONS

Stabilize today. Modernize for tomorrow.

IBM Power System-Based ERP Solutions

ERP solutions running on IBM Power Systems are critical for daily operations, yet over time they become increasingly difficult to maintain. Skills shortages, outdated technology, and technical debt lead to instability, security risks, and escalating costs. These issues limit agility and slow down innovation, preventing organizations from reaching their full potential.

A ROADMAP TO STABILITY & GROWTH



PHASE 1: STABILIZE

Create a solid operational foundation by addressing immediate risks.

- **System Health Check:** Identify bottlenecks, misconfigurations, and security gaps.
- **Performance Tuning:** Optimize system parameters, queries, and processes for reliability.
- **Risk Mitigation & Recovery:** Strengthen backups, disaster recovery, and high-availability plans.
- **Documentation & Training:** Deliver detailed system documentation and knowledge transfer.

PHASE 2: MODERNIZE

Enhance your ERP to support future business goals.

- **User Experience:** Upgrade dated interfaces into intuitive web and mobile tools.
- **Application Enhancement:** Extend ERP capabilities with new functionality on top of your core.
- **Seamless Integration:** Use modern APIs to connect ERP with CRM, analytics, and e-commerce.
- **Cloud Migration Strategy:** Plan for cost-efficient scalability in ProCern's private cloud.

The Value of Modernization

ProCern's two-phased methodology delivers measurable improvements in both system reliability and long-term business value.

Maximize Existing Investment

Extend ERP lifespan and avoid expensive system replacement.

Boost Productivity & Engagement

Improve efficiency with modern, mobile-ready interfaces..

Enhance Agility

Adapt quickly by integrating ERP with other applications.

Increase Reliability

Reduce downtime through stabilization and proactive risk management.

Lower Total Cost of Ownership

Reduce maintenance overhead and gain efficiency through cloud strategies.

Chart your path forward.

Begin with a ProCern discovery workshop. We'll evaluate your environment, stabilize immediate risks, and create a modernization roadmap that aligns with your long-term business goals.
